

### Alcatel-Lucent Enterprise UNIFIED ACCESS megoldás

Luky Gábor

2014. szeptember

# **Unified Access**

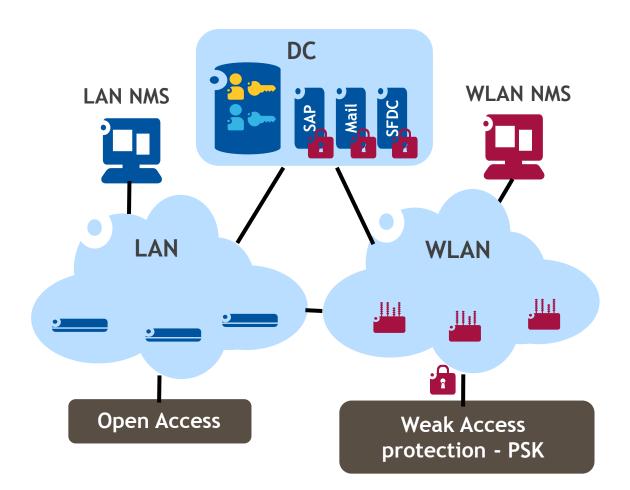

## One Network • One Management • Application Fluent

COPYRIGHT © 2013 ALCATEL-LUCENT. ALL RIGHTS RESERVED

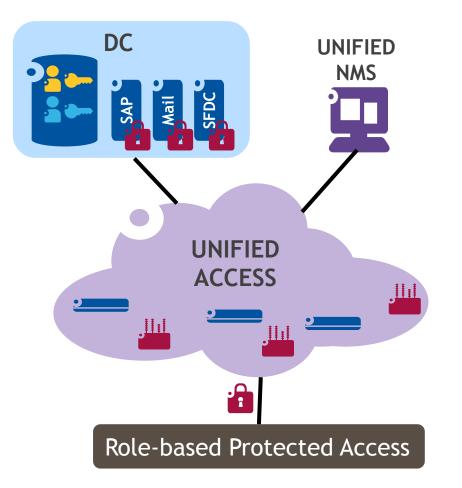

# Example of CORPORATE NETWORKS without unified access

- Corporate user directory secures application access only
- LAN is open to abuse
- Weak WLAN access security based on PSK
- Large investment operating two networks with independent management systems
- Inconsistent user experience between LAN and WLAN
- Poor or no QoS offered

# WHAT WE CAN OFFER WITH A unified access

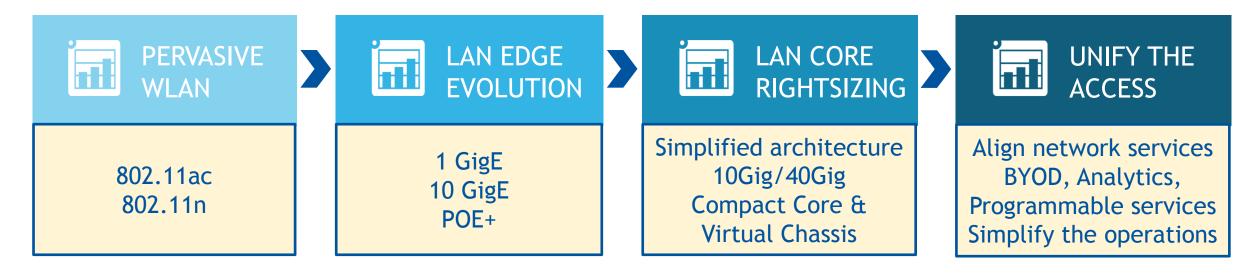

- Corporate user directory secures application and network access
- Secure LAN & WLAN access (based on roles)
- Reduced IT effort operating one integrated network with one management system
- Consistent user experience between LAN and WLAN
- Unified Role based QoS

# ✓ BETTER USER EXPERIENCE ✓ SIMPLIFIED OPERATIONS ✓ IMPROVED NETWORK SECURITY

THE ALCATEL-LUCENT ENTERPRISE PROPOSITION

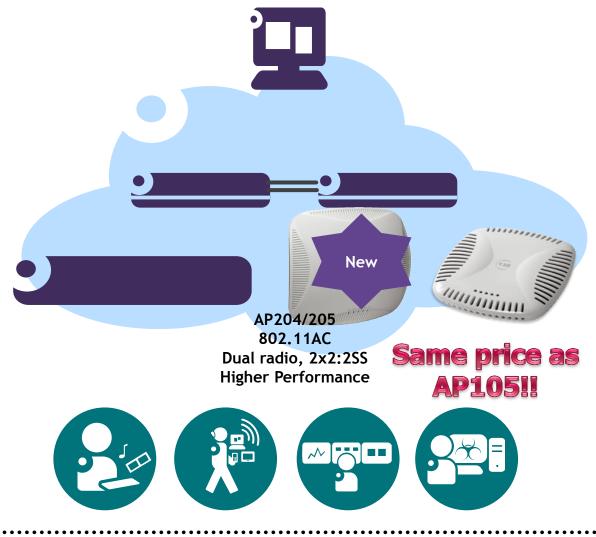

# The Industry's Most Flexible Network

SAME DEVICES YOU BUY TODAY WILL BE LEVERAGED THROUGH THE EVOLUTION PROCESS

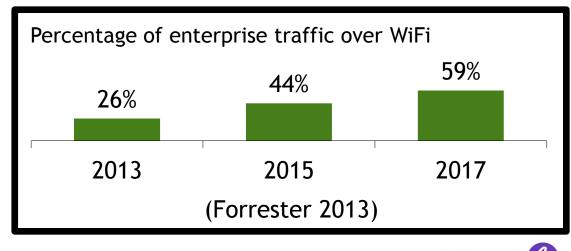

# PERVASIVE WLAN READY TO SUPPORT THE TREMENDOUS WIRELESS CONNECTIVITY GROWTH

#### **Pervasive WLAN**

- Application Fluent
- IEEE 802.11n/ac
- Ready for unified management
- Authentication enforcement
- Open to advanced policy enforcement

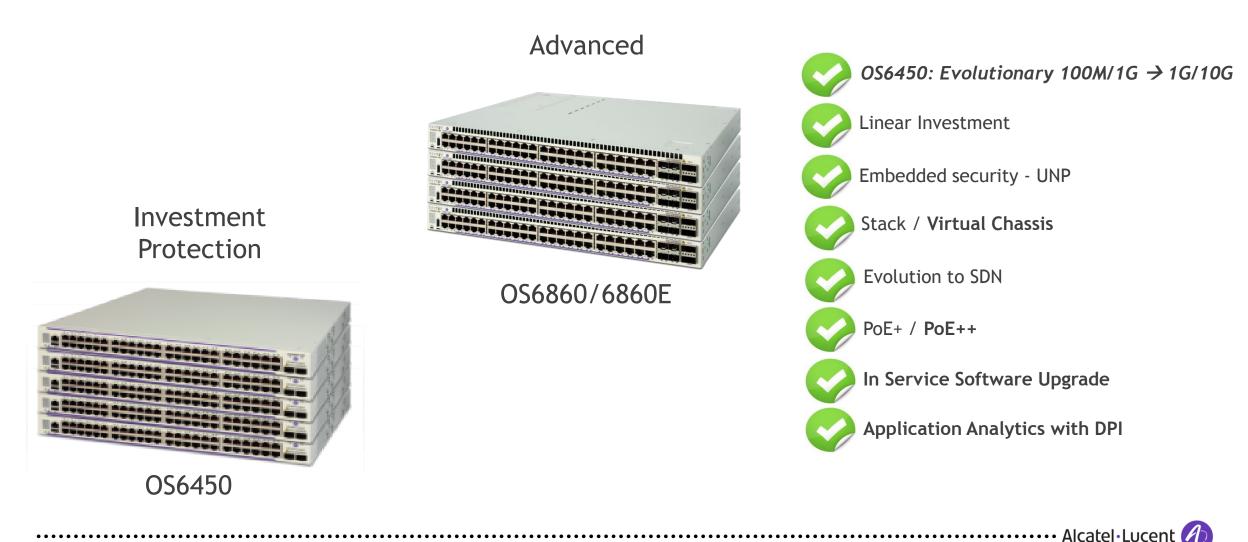

Alcatel·Lucent

PERVASIVE

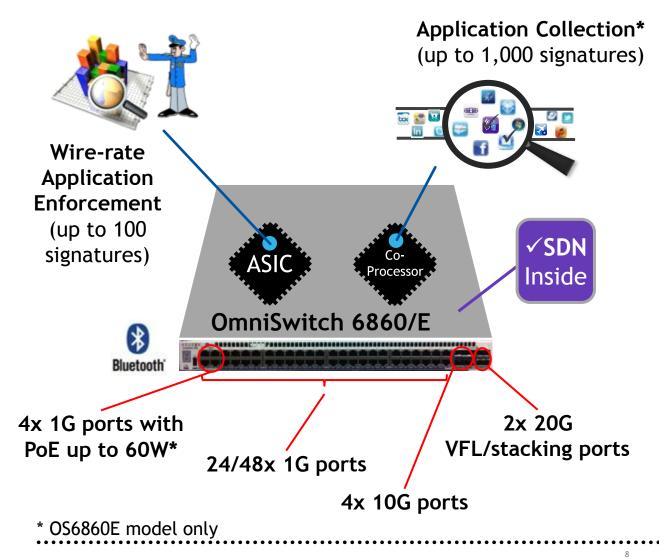

# TRANSFORM YOUR EDGE VERSATILE, HIGH PERFORMANCE, SECURE ACCESS

Enterprise

# OMNISWITCH 6860/E THE INDUSTRY'S MOST ADVANCED ACCESS SWITCH

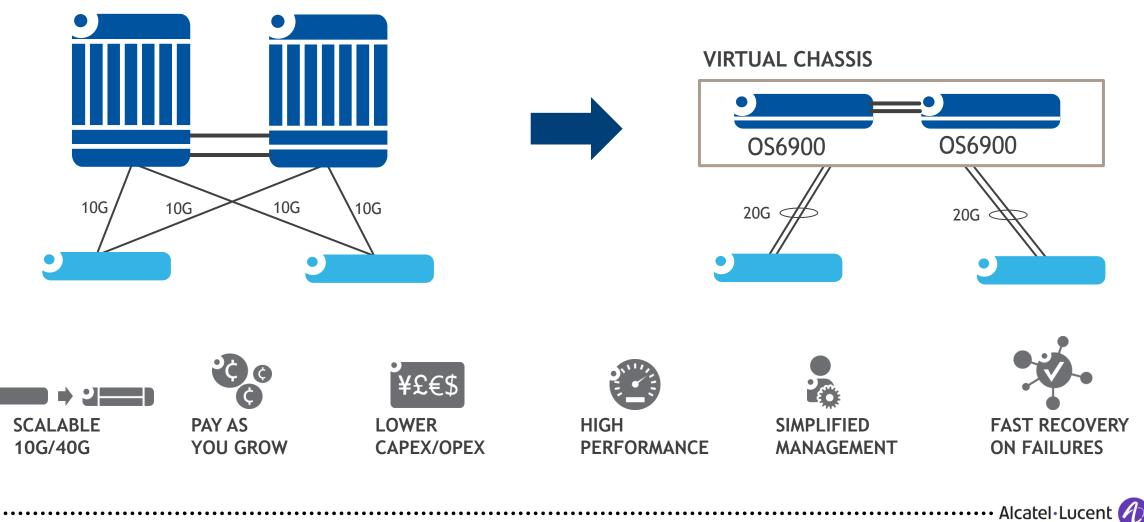

#### Innovative Architecture

- 256G wire rate engine
- Wire-rate DPI engine
- Coprocessor for enhanced network services \*
  - Application Collection
  - Future network services
- Power capabilities:
  - Up to 48 PoE+, 4 PoE-60W ports on E models
  - 1+1 redundant, hot-swappable power supplies
  - Power load sharing and Backup Power Shelf
- Virtual Chassis support
- IT friendly:
  - All ports, including stack in the front
  - Bluetooth management port
  - Front to back cooling

# **CORE EVOLUTION** RIGHT-SIZED, VIRTUALIZED NETWORK CORE

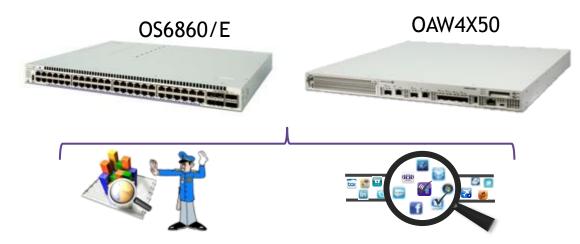

LAN CORE

RIGHTSIZING

# NETWORK ANALYTICS VISIBILITY & CONTROL

OV2500

#### Visibility

- Application Collection
- Application Reporting

#### Control

- Application Enforcement
- Policy Management

#### **Benefits**

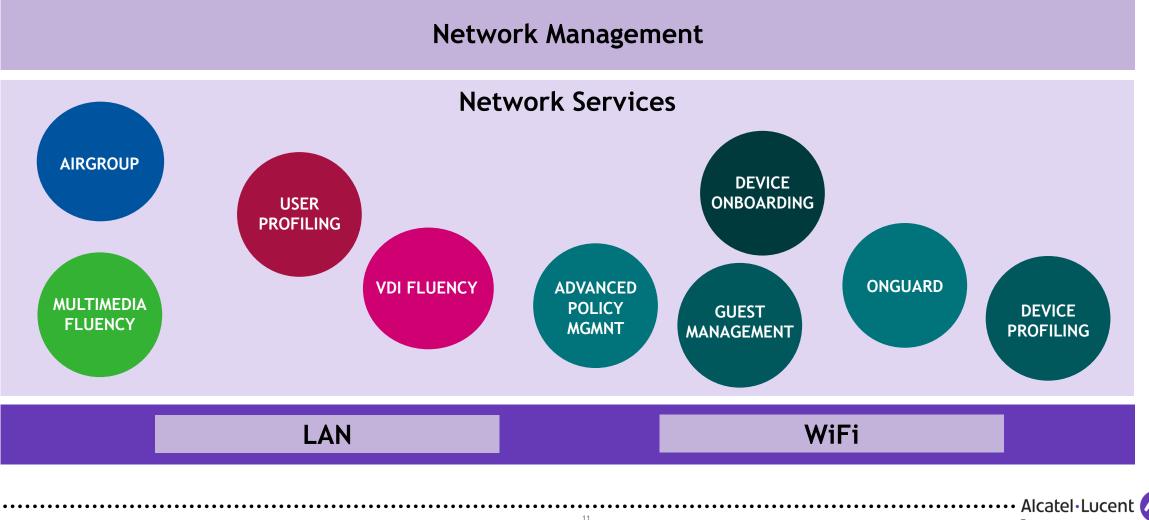

- Prioritizes business critical applications
- Increases security: Stop non-compliant apps
- Harmonizes business & personal network use
- Optimizes use of network resources
- Simplifies roll out of new applications

#### INTELLIGENCE AND ENFORCEMENT AT THE EDGE OF THE NETWORK

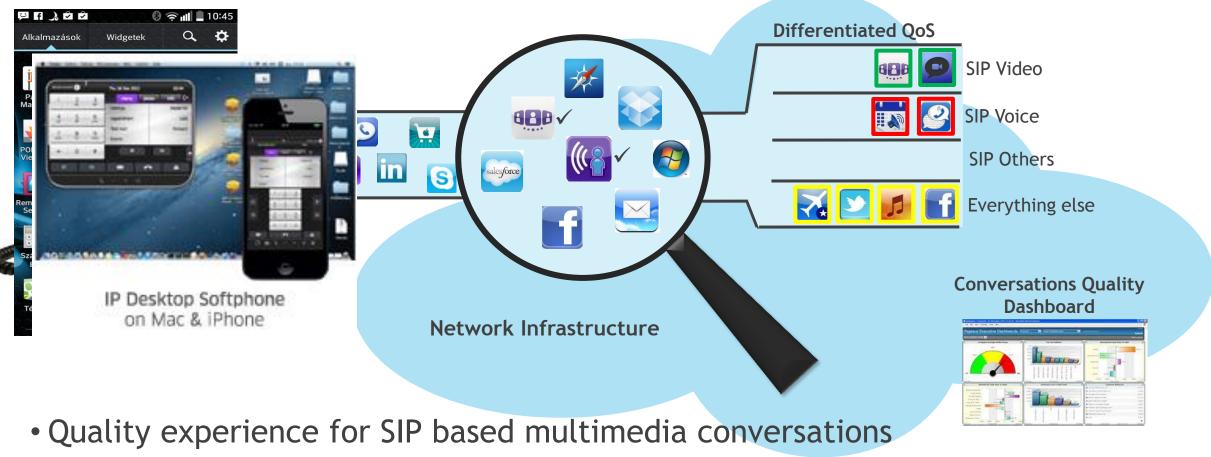

# UNIFIED ACCESS STRATEGY FOR CONVERGED CAMPUS SAME NETWORK SERVICES ON WIRED AND WIRELESS

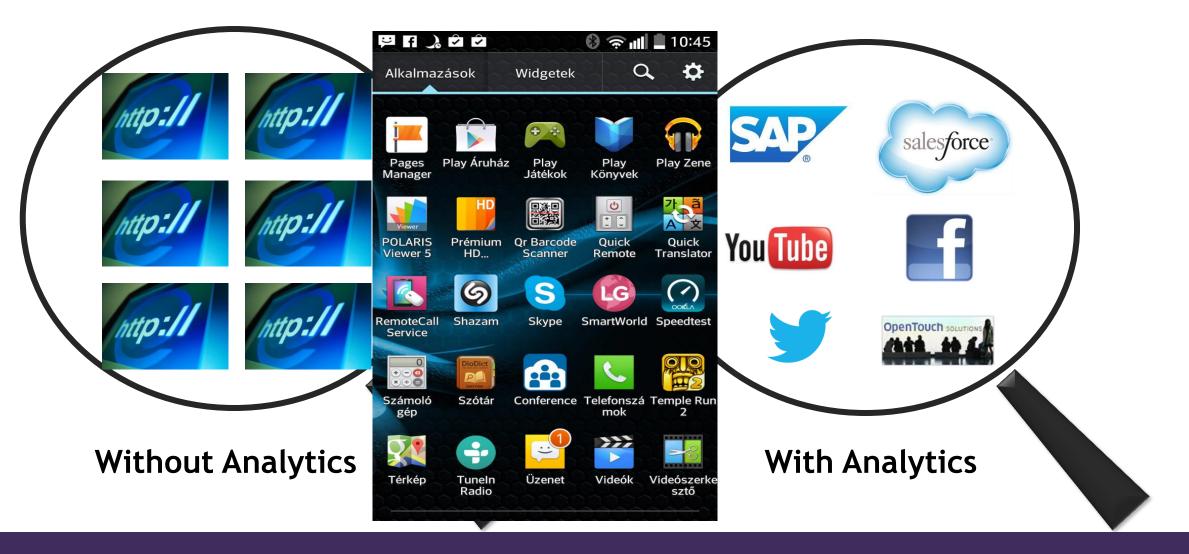

# **MULTIMEDIA FLUENCY** REAL-TIME PROTOCOLS DO NOT LIKE CONGESTION

• Visibility of actual service level via dashboard

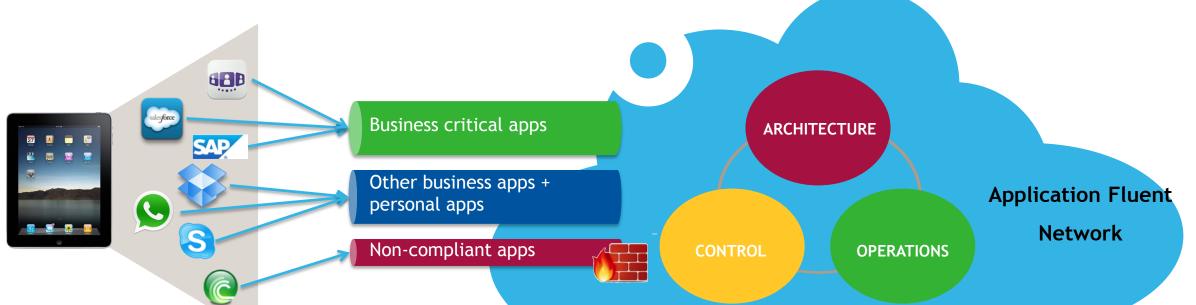

## **APPLICATION ANALYTICS** DETAILED VISIBILITY EVEN WITH THE "WEBIFICATION" OF APPLICATIONS

**21st Century Application Analytics** 

# **APPLICATION CENTRIC NETWORK SERVICES APPLICATION Recognition AND CONTROL**

Business-critical applications prioritized 

- Harmful/non-compliant applications stopped
- Harmonized coexistence of business and personal apps
- Available on OS6860 and OS6900 switches and WLAN controllers
